CURRENT ISSUES OF THE LEASE OF AGRICULTURAL LAND

S u m m a r y

The aim of the article is to emphasise the influence of the Act of 14 April 2016 on the Suspension of the Sale of the Property from the Agricultural Property Stock of the State Treasury (APSST) and the amendments to certain other acts on the functioning of the agricultural property lease. In conclusion, the authoress states that the lease as well as interest of such lease of agricultural land from the Agricultural Property Stock of the State Treasury will increase. Tenancy will become a basic way of starting and expanding large-scale agricultural farm holdings and the agricultural holdings run by the cooperatives or commercial companies. Various legal solutions that restrict the total area of the agricultural holding have also been identified.
